

Riviera

THE FINE WINES OF PUGLIA

THE FAMILY

The roots of the de Corato family are firmly rooted in the land of Apulia, in the countryside of Andria, on the plateau separating the Murgia hills and the Adriatic Sea, where Giuseppe, patriarch of the family born in the mid-19th century, was a farmer with great entrepreneurial qualities. In 1921 he bought, turning it into a model vine and olive growing farm, the vast estate that had belonged for centuries to the Rivera noble family from Abruzzo, whose founder was a captain of Emperor Frederick II of Swabia, who donated them to him.

It was in the historic cellars of the estate that Sebastiano de Corato, the youngest and most visionary of Giuseppe's sons, founded Rivera winery in the late 1940s, realizing the great winemaking potential of the hilly area dominated by the enigmatic Castel del Monte, masterpiece of Frederick II and a landmark of the region. His ambition to create a label that would represent Puglia in the wine firmament and his tenacity were soon rewarded, making Rivera the emblem of the region's enology and an indisputable driver of its resurgence.

In the 1970s, Sebastiano's son Carlo was the architect of experiments in the vineyards and modernizations in the winery that led to the development of innovative wines in the regional wine scene. Under his watch, sons Sebastiano and Marco, representing the fourth generation, today continue with commitment and pride a success story that has lasted more than a century and has made Rivera wines ambassadors of Puglia in markets around the world.

Located on the ancient Via Traiana at the foot of the Alta Murgia hills, the Rivera estates are a symbol of the history and agricultural development of an entire territory. Today, the property covers 150 hectares, equally divided between specialized vineyards and centuries-old olive groves cultivated according to sustainable farming protocols, surrounding the production complex that chronicles, in its layers, the evolution of wine production over the last century.

The historic winery, built in the late 19th century, is now used to age red wines in the two underground barrel cellars, one containing large barrels and the other barriques, all made of French oak. After early successes, a new wing was built in the 1960s, made of vitrified concrete wine vats, later remodeled and completely thermo-conditioned, dedicated to the finishing and storage of younger white, rosé and red wines.

The oenological heart of the winery today is the modern and efficient winemaking unit built next to the old cellars and equipped with small stainless steel tanks intended for maceration of rosé and red wines and fermentation of white wines. The entire winery complex is powered by a photovoltaic system that covers 35 percent of its entire energy needs.

In application of the winery's philosophy, at all stages of the production process, vineyard cultivation, grape harvest, vinification, aging and bottling of wines the most modern techniques of viticulture and enology are combined with absolute respect for natural processes, with a view to environmental and economic sustainability and continuous improvement of quality.

THE VINEYARDS

LAMA DEI CORVI VINEYARD

The vineyards, located on limestone-based high plateaus and exposed to northerly winds coming in from the Adriatic Sea, combined with the characteristics of native vines with slow, late ripening, make the Castel del Monte area an example of how Apulian wine production can be represented by wines of surprising freshness, elegance and longevity.

The soul of Rivera are the vineyards: 65 hectares of property, flanked by 75 Ha of specialized olive groves, trained by spurred cordon and guyot with high density of vines per hectare and low unit production, and cultivated according to sustainable farming protocols in a wine growing project that focuses everything on quality and the enhancement of the different terroirs of the estate.

The Rivera, Torre di Bocca, Tafuri and Monte Carafa plots, between 180 and 250 meters above sea level, are characterized by limestone-tufaceous soils of marine sedimentation, poor and deep. Native white grapes, such as Fiano and Bombino Bianco, with surprising sapidity, and red grapes - Bombino Nero, Nero di Troia, Aglianico and Montepulciano of elegance and structure are grown there.

Added to these is the impressive Lama dei Corvi vineyard, created by crushing the typical limestone rocks on a spur of the Alta Murgia hills at an elevation of 350 meters with views toward the Adriatic Sea and the distant Gargano massif, which gives Chardonnay and Sauvignon distinctive freshness and minerality. A few trusted suppliers fill the remaining grape requirements.

TAFURI VINEYARD

THE WINES

Rivera's production is naturally centered on the Castel del Monte DOC and DOCGs, of which it was proudly the founder, inspiring the evolution and interpreting all its varieties and typologies, going so far as to develop in more than 70 vintages a wide and deep range of white, rosé and red wines from the freshest and most delicate to the most complex and structured, all sharing the freshness and elegance that distinguish the territory's style.

Such finesse is also reflected in the wines representing the main grape varieties and appellations of Salento, in the south of the region, which complete the range with wines of great solariness and personality.

Common character of all Rivera wines is the winemaking style that rigorously interprets the different terroirs and grape varieties, highlighting balance, elegance and drinkability for the pleasure of discerning consumers. A style that brings together a bond with tradition and attention to the evolutions of technique and the market.

NERO DI TROIA

BOMBINO NERO

CASTEL DEL MONTE

CRU

PUER APULIAE

CASTEL DEL MONTE
NERO DI TROIA RISERVA
D.O.C.G.
